

## [2023 Practice with these 2V0-62.21 dumps Certification Sample Questions [Q19-Q35]

**[2023 Practice with these 2V0-62.21 dumps Certification Sample Questions Get Instant Access of 100% REAL 2V0-62.21 DUMP Pass Your Exam Easily**

VMware 2V0-62.21 exam is intended for professionals who are looking to advance their careers in IT and enterprise mobility management. It is an ideal certification for IT professionals who are responsible for deploying, configuring, and managing the VMware Workspace ONE platform. Professional VMware Workspace ONE 21.X certification exam validates the candidate's ability to deploy and manage the Workspace ONE platform, configure user access, set up policies, and troubleshoot various issues that may arise.

**Q19.** Refer to the Exhibit.

## iOS Add Compliance Policy

1 Rules 2 **Actions** 3 Assignment 4 Summary

Immediately perform the following actions  Mark as Not Compliant

Notify Send Push Notification to Device  Default template

After 1 Day Perform the following actions:  Repeat  Mark as Not Compliant

Notify Send Email to User CC: admin@company.com  Default template

After 1 Days Perform the following actions:  Repeat  Mark as Not Compliant

Application Block/Remove All Managed Apps

+ Add Escalation

An administrator has set up an iOS compliance policy for unwanted apps.

Which of the following is the expected behavior when Workspace ONE UEM receives the app sample indicating the presence of the unwanted app?

- \* After 1 day, end user will receive the push notification.
- \* The concerned device will be marked as Non-compliant immediately.
- \* The concerned device will be unenrolled.
- \* After 2 days, all managed apps will be blocked/removed from the concerned device.

**Q20.** An administrator of a Workspace ONE Access tenant would like to add the company's logo and standard color scheme to their tenant.

Where would the administrator accomplish this task?

- \* In the Workspace ONE UEM console > Configurations. Identity & Access Management tab > select Setup then Custom Branding.
- \* In the Workspace ONE Access console > Setup. Identity & Access Management tab > select Custom Branding.
- \* In the Workspace ONE UEM console > Identity & Access Management tab > select Setup then Custom Branding.
- \* In the Workspace ONE Access console > Identity & Access Management tab > select Setup then Custom Branding.

**Q21.** When configuring a Certificate Authority in Workspace ONE, which three protocols are supported? (Choose three.)

- \* ADCS
- \* SCEP
- \* EST
- \* PKI

\* CMP

**Q22.** An administrator would like to configure SSO for Workspace ONE UEM console login.

Which catalog setting from Workspace ONE Access need to be configured?

- \* WebApps
- \* Virtual Apps
- \* Hub Configuration
- \* Hub Catalog

**Q23.** An administrator wants to leverage the Workspace ONE Web application to allow end-user credentials to be passed to specific internal sites.

Which security policy in Workspace ONE UEM must be configured?

- \* Offline Access
- \* Single Sign-On
- \* Network Access Control
- \* Integrated Authentication

**Q24.** Which two are IT-driven on-boarding workflows for Windows 10 devices? (Choose two.)

- \* QR code enrollment
- \* native MDM enrollment
- \* command line interface (CLI) staging
- \* manual device staging
- \* barcode enrollment

[https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/Windows\\_Desktop\\_Device\\_Management/GUID-uemWindesKDeviceEnrollment.html#windows-10-device-staging-enrollment-6](https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/Windows_Desktop_Device_Management/GUID-uemWindesKDeviceEnrollment.html#windows-10-device-staging-enrollment-6)

With device staging, you can configure your Windows 10 devices for device management by Workspace ONE UEM before you send the devices to your end users.

The two staging methods are:

**Manual Installation**; Download and install the Workspace ONE Intelligent Hub and enter enrollment credentials. This method requires devices to be domain-joined before enrollment.

**Command Line Installation**; Download the Workspace ONE Intelligent Hub and then install and enroll the device using the command line. As per VMware Textbook. IT-driven Windows 10 onboarding includes the following methods:

- \* Command-line interface (CLI) staging
- \* Manual device staging
- \* Bulk provisioning and enrollment
- \* Image-based enrollment
- \* Co-management with SCCM and Workspace ONE UEM

[https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/Windows\\_Desktop\\_Device\\_Management/GUID-uemWindes](https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/Windows_Desktop_Device_Management/GUID-uemWindes)

kDeviceEnrollment.html#windows-10-device-staging-enrollment-6

**Q25.** What is the purpose of the Workspace ONE UEM Security Pin?

- \* Serves as a second layer of security for administrators while preventing inadvertent commands.
- \* Provides a second factor of authentication for administrators during console login.
- \* Provides multi-factor authentication for users during device enrollment.
- \* Serves as a second layer of security for end users while preventing inadvertent commands.

**Q26.** Which administrative console is used to change to an organization logo (branding) in the Intelligent Hub Catalog?

- \* Workspace ONE Access
- \* Workspace ONE Hub Services
- \* Workspace ONE
- \* Workspace ONE UEM

**Q27.** Which is used to authenticate and encrypt traffic from individual applications on compliant devices to internal resources?

- \* VMware Tunnel
- \* Device Compliance
- \* Workspace ONE Intelligence
- \* Email Notification Service

**Q28.** Which three are benefits of a Workspace ONE Content productivity application? (Choose three.)

- \* Secure Document distribution and mobile access.
- \* Protect certificate keychain from third party access.
- \* Promote secure collaboration.
- \* Promote Content Disaster Recovery.
- \* Protect sensitive content in a corporate container.
- \* Secure application distribution and mobile access.

**Q29.** A company using Mobile SSO would like to avoid deploying an additional connector for Workspace ONE.

They currently do not have a use case for Virtual Apps or advanced authentication such as kerberos, RDA SecureID or Radius.

Which configuration can be used to sync users and groups with a single connector of Workspace ONE?

- \* Directory Sync from Workspace ONE UEM to Workspace ONE Access
- \* Directory Sync from Workspace ONE Assist to Workspace ONE Access
- \* Directory Sync from Workspace ONE Access to Workspace ONE Unified Access Gateway
- \* Directory Sync from Workspace ONE Intelligence to Workspace ONE Access

**Q30.** Which two Workspace ONE UEM core components are required for all on-premises environments? (Choose two.)

- \* Device Services
- \* AirWatch Cloud Connector
- \* Unified Access Gateway
- \* Secure Email Gateway
- \* Console Services

**Q31.** A company using Mobile SSO would like to avoid deploying an additional connector for Workspace ONE. They currently do not have a use case for Virtual Apps or advanced authentication such as kerberos, RDA SecureID or Radius.

Which configuration can be used to sync users and groups with a single connector of Workspace ONE?

- \* Directory Sync from Workspace ONE UEM to Workspace ONE Access

- \* Directory Sync from Workspace ONE Assist to Workspace ONE Access
- \* Directory Sync from Workspace ONE Access to Workspace ONE Unified Access Gateway
- \* Directory Sync from Workspace ONE Intelligence to Workspace ONE Access

**Q32.** Administrators have noticed that all iOS devices are not checking into Workspace ONE in their SaaS environment. They are also unable to send any push notifications to the iOS devices. However, Android and Windows devices are working fine.

What can the administrator do to resolve the issue?

- \* Make sure that the Rest API and SOAP API certificate are valid.
- \* Make sure that all SSL certificates used for the Workspace ONE environment are valid.
- \* Make sure that the APNs certificate is valid and not expired.
- \* Make sure that the Email Notification Service v2 is configured.

**Q33.** Which of the following is a prerequisite to deploy VMware Unified Access Gateway OVF?

- \* VMware vSphere
- \* VMware Workstation
- \* VMware Fusion
- \* VMware Horizon

**Q34.** Which feature of Workspace ONE UEM can be configured to allow reports to run on a schedule and have them delivered to a subset of administrators?

- \* Windows Scheduled Tasks
- \* Report Subscriptions
- \* Timed Report Execution
- \* SQL Server Reporting Services

[https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/WS1\\_ReportsAnalytics.pdf](https://docs.vmware.com/en/VMware-Workspace-ONE-UEM/services/WS1_ReportsAnalytics.pdf)

**Q35.** Which of the following explains the differences between Workspace ONE UEM reports and Workspace ONE Intelligence Custom Reports?

- \* Workspace ONE Intelligence Reports uses an on-premises reporting database to push data to a reports cloud service as Workspace ONE UEM Reports extracts data from your Workspace ONE UEM environment.
- \* Workspace ONE Intelligence Reports uses a separate service to push data to a reports cloud service and Workspace ONE UEM Reports extracts data from your WS ONE UEM environment.
- \* Workspace ONE Intelligence Reports use the same an API service to push data to a reports cloud service as Workspace ONE UEM Reports.
- \* Workspace ONE Intelligence Reports use the same service to push data to a reports cloud service as Workspace ONE UEM Reports.

VMware 2V0-62.21 exam is an essential certification for IT professionals who specialize in managing and deploying VMware Workspace ONE solutions. Professional VMware Workspace ONE 21.X certification program validates your knowledge and skills

in the VMware Workspace ONE platform and demonstrates your ability to design, deploy, and manage end-to-end solutions that meet the needs of your organization and its users.
