

[UPDATED 2024 Free F5 101 Exam Questions Self-Assess Preparation [Q68-Q89]

[UPDATED 2024] Free F5 101 Exam Questions Self-Assess Preparation 101 Free Sample Questions to Practice One Year Update

To prepare for the F5 101 Certification Exam, candidates can choose from a variety of study materials, including online courses, study guides, and practice exams. F5 Networks also offers a free online training course called Getting Started with F5, which provides an overview of the F5 application delivery platform and the fundamentals of application delivery.

F5 101 Exam is an excellent way for individuals to demonstrate their expertise in application delivery networking. Whether you are a network engineer, security specialist, or IT professional, passing 101 exam can help you advance your career and demonstrate your value to employers. So, if you are interested in application delivery networking, consider taking the F5 101 Exam to prove your skills and knowledge.

NEW QUESTION 68

In the following configuration, a virtual server has the following HTTP class configuration:

```
HTTP Class 1 = Host pattern www.f5.com
```

HTTP Class 2 = No filters

A request arriving for WWW.F5.COM will be matched by which class(es)?

- * Class 1
- * Class 2
- * Both Class 1 and Class 2
- * The request will be dropped

NEW QUESTION 69

Which four of the monitoring methods listed below can GTM use to determine the status and performance of BIG-IP and servers?

- * ping
- * Application monitors
- * Inband monitors
- * SSH
- * iQuery
- * SNMP

NEW QUESTION 73

A monitor has been defined with an alias port of 443. All other options are left at their defaults.

The administrator wishes to assign it to a pool of members where the members' ports vary. Which is the result?

- * For each member, if the member port is not 443, the member will be marked down. For each member, if the member port is not 443, the member will be marked down.
- * For each member, the monitor will test member node at port 443. For each member, the monitor will test the member node at port 443.
- * For each member. If it is running an SSL service at the member port, the monitor may work. Otherwise, the monitor will fail and the member for each member, if it is running an SSL service at the member port, the monitor may work. Otherwise, the monitor will fail and the member will be marked down.
- * This assignment is not allowed since the port do not match.

NEW QUESTION 74

Which of the following is correct concerning HTTP classes?

- * A single web application can be used by several HTTP classes
- * A virtual server can only have one web application associated with it
- * A single ASM enabled HTTP class can be used by multiple virtual servers
- * Each ASM enabled HTTP class can have several active security policies associated with it

NEW QUESTION 75

Which of the following methods are used by the BIG-IP ASM System to protect against SQL injections?

- * HTTP RFC compliancy checks
- * Meta-character enforcement and attack signatures
- * HTTP RFC compliancy checks and length restrictions
- * Response scrubbing, HTTP RFC compliancy checks, and meta-character enforcement

NEW QUESTION 76

Which IP subnet mask can be used to send traffic to all network nodes?

- * 192.168.0.255/23
- * 192.168.1.11/31
- * 172.16.1255/22
- * 192.168.0.11/30

NEW QUESTION 77

Which of the following are correct regarding Wildcard entities? (Choose 2)

- * Wildcard entities are the basis for positive security logic.
- * Wildcard entities are the basis for negative security logic.

- * Wildcard entities require the need to learn only from violations.
- * Wildcard entities can be applied to file types, URLs, cookies and parameters.

NEW QUESTION 78

A monitor has been defined using the HTTP monitor template. The send and receive strings were customized, but all other settings were left at their defaults. Which resources can the monitor be assigned to?

NEW QUESTION 79

The administrator must specify APM access control entries as either L4 or L7.

- * True
- * False

NEW QUESTION 80

The ARX saves customers time, money and frustration through a stub-based system that makes a slight modification to each file in order to more efficiently sort and store end user data.

- * True
- * False

Explanation/Reference:

NEW QUESTION 81

Since F5 built GTM on the TMOS platform it can exist on the same BIGIP device as LTM:

- * True
- * False

NEW QUESTION 82

A BIG IP Administrator observes that the pool member status is a blue square What does this status indicate?

- * The object is available
- * The availability of the object is unknown.
- * The object has reached its configured connection limit
- * The object is unavailable.

NEW QUESTION 83

Administrators can customize APM to resemble other internal Web applications in the organization.

- * True
- * False

Explanation/Reference:

Explanation:

NEW QUESTION 84

What does the insert XForwarded For?

option in an HTTP profile do?

What does the 'insert XForwarded For' option in an HTTP profile do?

- * A BIG-IP self-IP is inserted in the source address field on the server-side connection.
- * A BIG-IP self-IP is inserted in the source address field on the client-side connection.
- * The client IP addresses are inserted into messages sent to remote syslog servers.
- * The client IP addresses are inserted into HTTP header.

NEW QUESTION 85

The Flow Login feature prevents which web vulnerability from occurring?

- * Buffer overflow
- * Cookie poisoning
- * Forceful browsing
- * Cross site scripting

NEW QUESTION 86

What technology does ARX use to create a logical abstraction of the physical storage environment?

- * Data de-duplication
- * File virtualization
- * Server virtualization
- * SSL encryption

NEW QUESTION 87

Mobile device browsers typically display Web pages more slowly than PC browsers.

- * True
- * False

NEW QUESTION 88

A customer says his business wouldn't benefit from buying ARX because it already has block based storage virtualization in place. Is he right? Why or why not?

- * Yes. Block based storage virtualization is just another name for file virtualization.
- * No. ARX allows customers to implement storage tiering benefits, but block based storage virtualization does not.
- * Yes. Block based storage virtualization offers the same functionality as ARX's file virtualization, although it uses slightly different technology.
- * No. Both technologies attempt to solve similar problems, but only the ARX allows the customer to have visibility into their data and apply business policy at the file level. Block based virtualization has no visibility into the type of data.

NEW QUESTION 89

Select F5 platforms have which three certifications? (Choose three.)

- * FIPS
- * SECG
- * NEBS
- * IEEE
- * Common Criteria
- * AFSSI
