- * Field mapping
- * Policy editor
- * Drag-and-drop visual editing
- * Hosted page editor
- * Language translation support

NO.36 Which of the following actions would trigger an update to the consent vault?

- * A user opts out of a newsletter.
- * A user connects their account to their social media network account.
- * A user executes a login but is taken to the Registration Completion screen.
- * A user updates their email address and contact details.

NO.37 What data is required to perform a JWT validation? Note: There are 3 correct answers to this question

- * signatureKey
- * LoginId
- * header
- * payload
- * signature

NO.38 What is the purpose of the profile schema?

- * To store the risk score of users
- * To store device data of users
- * To store a predefined set of customer fields common to all sites
- * To store the transactions of users

NO.39 What information is recorded automatically for each consent entry in the consent vault? Note: There are 3 correct answers to this question.

- * Source IP
- * Related product
- * Purpose
- * Consent version
- * User agent

NO.40 You are implementing a mobile app and want to expire user sessions after 1800 seconds.

How can you achieve this?

- * By setting a value of 1800 for the sessionExpiration parameter in cookie settings
- * By setting a value of 1800 for the session Expiration parameter together with the API key when initializing the SDK
- * By setting a value of 1800 for the sessionExpiration parameter when calling accounts.login
- * By setting a value of 1800 for the sessionExpiration parameter when calling accounts.initSession

NO.41 What data is required to perform a JWT validation? Note: There are 3 correct answers to this question.

- * Signature
- * header
- * LoginId
- * signatureKey
- * payload

NO.42 You are validating a JWT and want to be sure you use the correct public key.

What do you need to check?

- * The keyid of the public key is the same as the keyID in the JWT header.
- * The expiration time of the JWT lies within the expiration time defined in the public key.
- * The issuer of the public key is the same as the issuer in the JWT header.
- * The public key hash is the same as the signature hash of the JWT.

NO.43 You used Social Login to implement Web screen-sets on your mobile application; however, the pop- up window is being blocked by the mobile browser, and as a consequence, the login process is failing.

How do you fix this? Note: There are 2 correct answers to this question.

- * Set the Success Screen using the Console's UI Builder to avoid the pop-up window.
- * Use the authFlow: ‘redirect param
- * Write a custom code to avoid a pop-up window.
- * Handle the onLogin event.

NO.44 You have uploaded CSV translation files through the Localization menu in screen-sets, but the screen-sets are displayed How can you fix this?

- * Using the customLang parameter in Web SDK configuration
- * Using the browser-provided automatic translations
- * Using profile.locale in accounts.showScreenSet call
- * Using the lang parameter in Web SDK configuration

NO.45 What is the recommended approach to make a native API call, such as getAccountinfo, from an Android client?

- * Use an application key and secret and make an HTTP POST call to the API endpoint.
- * Use an application key and secret and make an HTTP GET call to the API endpoint.
- * Use internal SDK method Gigya.getInstance().send to call the API method.
- * Use internal SDK method Gigya.getInstance().send to call the API method with an application key and secret.

NO.46 Which fields can be found inside a subscription schema? Note: There are 2 correct answers to this question.

- * isSubscribed
- * acceptanceDate
- * doubleOptin
- * isEnabled

NO.47 You are implementing a website that will allow users to log in using their existing company credentials by initiating an OIDC flow.

How would you configure your website and SAP Customer Data Cloud?

- * SAP Customer Data Cloud as the RP, and the website as the OP
- * SAP Customer Data Cloud as the SP, and the website as the OP
- * SAP Customer Data Cloud as the IdP, and the website as the SP
- * SAP Customer Data Cloud as the RP, and the website as the IdP

NO.48 What are some SAP recommended guiding principles to achieve clean core operations?

Note: There are 3 correct answers to this question.
