C-CPE-16 PDF Dumps Exam Questions & Valid C-CPE-16 Dumps

SAP C-CPE-16 Exam Syllabus Topics:

Topic 1- SAP Cloud Application Programming Model: This section of the exam covers how to perform error handling; including custom logic and how to describe synchronous vs. asynchronous APIs. Topic 2- SAP Build Process Automation: The current section of the exam covers building an automated process with SAP Build Process Automation. Topic 3- Application Extension Development & Deployment: This section of the exam covers the understanding of software applications while configuring them to ensure they work correctly. It also covers the Kyma runtime on SAP BTP, service discovery mechanisms, and service meshes to manage their communication. Topic 4- DevOps and Continuous Delivery: This section of the exam aims to cover DevOps and CI- CD; it covers setting up the CI infrastructure and using Git; explains the Continuous Delivery pipeline and what is Continuous Delivery pipeline.

NEW QUESTION 28

What feature of the pre-built content packages in SAP Build Process Automation increases the speed of development? Note: There are 2 correct answers to this question.

- * Templated automations
- * Predetermined decisions
- * Enhanced user interface
- * Plug-and-play availability

NEW QUESTION 29

You want to create a new service definition in your CAP project. In which folder do you place the service definition .cds file?

- * /app
- * /db
- * /srv
- * /root

NEW QUESTION 30

What must you do to pull a container image from a private registry? Note: There are 2 correct answers to this question.

- * Create a secret with the type `kubernetes.io/dockerconfigjson`;
- * Create a secret with the type `Opaque`;
- * Provide credentials in the pod manifest via `imagePullSecrets`; in

`spec.template.metadata.annotations`;

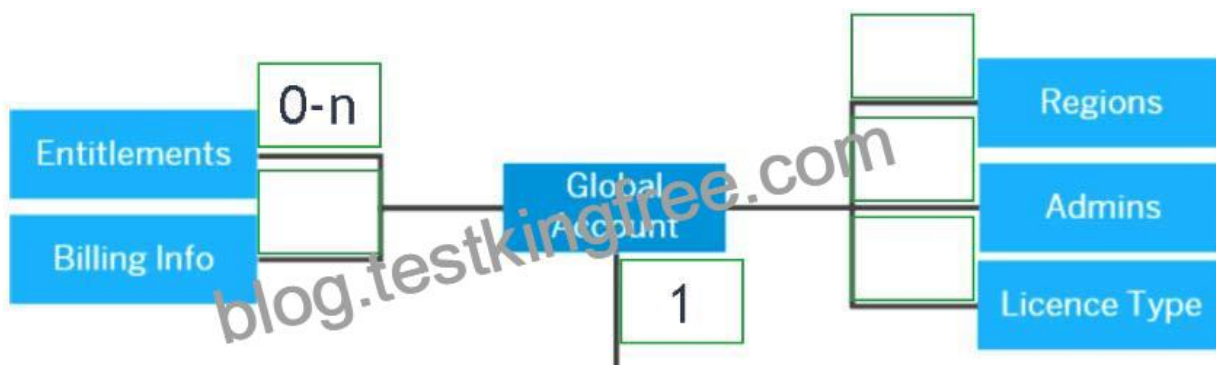

- * Provide credentials in the pod manifest via `imagePullSecrets`; in `spec.template.spec`.

NEW QUESTION 31

DRAG DROP

A global account has a relationship with entitlements. The cardinality of this relationship is `0-n`; as shown in the graphic. What are the cardinalities for the other relationships in the attached diagram?

(Drag and drop the labels at the bottom onto the framed locations of the image above.)

1	0-1	1-n	0-n
---	-----	-----	-----

NEW QUESTION 32

You want a service to react to a specific event.

What can you specify as <phase> in the statement `srv.<Phase> (<event>)`? Note: There are 2 correct answers to this question.

- * end
- * begin
- * after
- * before

NEW QUESTION 33

Which of the following are features of Kubernetes? Note: There are 3 correct answers to this question.

- * Immutability and self-healing
- * Hardware virtualization
- * Service Discovery and load balancing
- * Operating system management Storage orchestration

NEW QUESTION 34

In your Git system, you have set up a webhook for your SAP Continuous Integration and Delivery pipeline. What does the webhook require to send a request to the specified payload URL? Note: There are 2 to choose.

- * A password
- * A secret
- * A content type
- * A user

NEW QUESTION 35

What are some principles of continuous integration? Note: There are 2 correct answers to this question.

- * Automated tests
- * Automated deployment to the productive system
- * Automated builds
- * Automated code change pushes

NEW QUESTION 36

Which of the following are the fundamental guidelines of a twelve-factor application? Note: There are 3 correct answers to this question.

- * Cache management
- * Traceability and reproducibility of all changes
- * Security management of software layers
- * Stateless and self-contained application processes
- * Separation of application code and runtime configuration

NEW QUESTION 37

What is JavaScript Object Notation (JSON)?

- * A simple way to annotate objects in JavaScript.
- * An open-standard format to structure data transferred using web technologies.
- * A notation command for automatically instantiating JavaScript objects.
- * An open-standard format to structure JavaScript programs.

NEW QUESTION 38

Your CAP project contains an entity called Books. You want to extend the Books entity with the managed aspect.

You have already imported the aspect from the `‘@sap/cds/common’` package (see code).

```
using {managed} from '&#8216;@sap/cds/common&#8217;;
```

```
* entity Books {
```

```
  key ID: UUID @(Core.computed: true);
```

```
  title: String;
```

```
  author: String;
```

```
}
```

Which is a valid way to extend the entity with the aspect?

```
* entity Books: managed {
```

```
  key ID: UUID @(Core.Computed: true);
```

```
  title: String;
```

```
  author: String;
```

```
}
```

```
* entity Books: {
```

```
  key ID: UUID @(Core.Computed: true);
```

```
  title: String;
```

```
  author: String;
```

```
}
```

```
aspect managed Books {  
* entity Books: {  
  
key ID: UUID (Core.Computed: true);  
  
title: String;  
  
author: String;  
  
aspect managed;  
  
}
```

NEW QUESTION 39

What can you use to register the JavaScript implementation of an event handler for external services to the framework?

- * An inline function passed to result of cds.connect()
- * An inline function passed to result of cds.serve()
- * A.js file with the same name as the .cds file
- * An @impl annotation in your CDS model file

NEW QUESTION 40

Your company is using the SAP Authorization and Trust Management service in conjunction with the XSUAA service to authorize their applications. Where do you bundle your defined scopes in role- templates?

- * In an xs-security.json file
- * In an instance of the XSUAA service
- * In a role-collection

NEW QUESTION 41

When deploying applications on SAP BTP, what is the maximum application package size?

- * 2 GB
- * 1 GB
- * 2.5 GB
- * 1.5 GB

NEW QUESTION 42

What is a necessary step to implement a custom error handler in the CAP SDK for Node.js?

- * Register the error handler function for the before phase of the error.
- * Catch exceptions during a CRUD operation.
- * Register the error handler function for the on phase of the error.
- * Write a custom Node.js package.

NEW QUESTION 43

What do you use to update the Git history of the local file you are working on?

- * Save

- * Commit
- * Stage
- * Check out

NEW QUESTION 44

What are some characteristics of CAP event handling? Note: There are 2 to choose.

- * You can register only one event handler for a specific event.
- * You must use the handler registration API `srv.emit(<event>)` to de-register event handlers.
- * You can register event handlers with instances of `cds.service` to add custom logic.
- * You can register multiple event handlers for each event phase.

NEW QUESTION 45

Which language do you use to create a data model in a CAP project?

- * SQL
- * Core Data Services Query Language (CQL)
- * Core Data Services Definition Language (CDL)
- * ABAP

NEW QUESTION 46

What are some benefits of using Forms in SAP Build Process Automation? Note: There are 2 correct answers to this question.

- * Streamline business process approvals easily
- * Create documents for processes easily
- * Create an interactive UI easily
- * Create and share email templates easily

NEW QUESTION 47

In SAP Build Process Automation, what is a decision table rule?

- * A tabular set of input/output rule expressions
- * A set of pre-defined data objects
- * A tabular set of business process decisions
- * A set of rule expressions in an IF-THEN format
